Motivated Java Developer with hands-on experience in building scalable web applications using Java, Spring Boot, Spring Security, Hibernate, and MySQL. Experienced with Spring IoC, Dependency Injection, Hibernate/JPA, and MVC architecture. Familiar with frontend technologies like HTML, CSS, JavaScript, and ReactJS. Passionate about building scalable applications and writing clean, maintainable code.

Experience	Skills
Software Trainee – Java Developer (NGS Pvt Ltd May 2025 – Dec 2025) Project Description: - Developed a web-based system to automate the Letter of Credit (LC) application process for banking operations. - The system allowed users to submit LC requests, view application details, and track approval status. - Helped improve operational efficiency by reducing manual processing and improving data accuracy. - Backend services were developed using Java, Spring Boot, Hibernate, and MySQL with REST APIs for system integration. Responsibilities: - Assisted in developing backend modules using Java and Spring Boot. - Created and tested REST APIs for basic operations such as creating and retrieving LC applications. - Implemented database integration using Hibernate with MySQL for storing application data. - Participated in API testing, bug fixing, and resolving issues.	Backend: - Java - Spring Core - Spring MVC - Spring Boot - Spring Security with JWT - Hibernate - REST API Development Frontend: - HTML5 - CSS3 - JavaScript - ReactJS - Tailwind CSS - GSAP Database - MySQL Tools & Technologies: - Git - GitHub - Maven - Postman - IntelliJ IDEA - VS Code Additional Knowledge: - Layered Architecture (Controller, Service, Repository) - MVC Design Pattern - Basic understanding of Microservices Architecture
Projects	
Nexora – Secure Digital Platform - Built a secure full-stack platform using React, Spring Boot, Spring Security, JWT, and Supabase PostgreSQL. - Implemented role-based authentication and authorization, with protected user and admin routes. - Developed complete user CRUD management, profile management, validation, and admin controls. - Designed a responsive admin dashboard with user actions, profile management, search/filter functionality, and toast-based success/error notifications. Bootcamp - Learning Platform - Platform Development: Built a web-based learning platform using Spring Boot and Java . - Access Control: Integrated Spring Security for authentication, authorization, and role-based access control for Students and Admins. - Core Functionality: Implemented a dynamic course catalog . - Database Design: Utilized Hibernate/JPA and MySQL to manage complex data relationships between users, course content.	
Certification	
- PG-DAC – SM VITA, Mumbai (2022) - Full Stack Java Development – Ducat, Delhi (2023) - Full Stack Java Development – JSpiders, Hyderabad (2024)	
Education	
- MCA Magadh University – 2021 – 73% - BCA Magadh University – 2015 – 65%
